Technatomy Corporation Awarded Department of Veterans Affairs, Applying Knowledge Management Tools to Clinical Systems Contract

(FAIRFAX, VA. November 1, 2010) - Technatomy Corporation announced today that it has been awarded a one-year contract under the VETS GWAC Contract Vehicle to assist the VA Puget Sound Health Care System in establishing a functional prototype for a knowledge management and clinical workflow system capable of supporting the Computerized Patient Record System (CPRS) Technatomy's support includes: clinical workflow process review and optimization, clinical system analysis, knowledge management (KM) software development including introduction of a SharePoint 2010 KM Tool, system architecture, and system administration training. This contract supports the VA's Veterans Health Administration (VHA) Innovation Program's Knowledge Management Team.

Technatomy Corporation has teamed with Microsoft Corporation Consulting Services to support all facets of this contract. As an industry leader in software development, Microsoft is dedicated to providing software and solutions to customers that enables them to maximize their investments. Our Team applies specific knowledge management methodologies and tools to CPRS configuration creating a knowledge asset that can be scalable across the organization. Advocacy and maintenance of standardized clinical workflow processes for VA hospitals is also provided. Technatomy and Microsoft both have extensive experience supporting the VA and the Technatomy Team brings "day-one" assets and proven processes to the Department of Veterans Affairs.

"We are pleased that the VA has recognized our team's capabilities" said Nadeem Butler, CEO of Technatomy Corporation. "We will continue meet the challenges faced in providing innovative solutions necessary to support our nation's veterans."

This award continues Technatomy Corporation's support of critical government programs. Technatomy Corporation is headquartered in Fairfax, VA.
