Technatomy Corporation Wins Prestigious Small Business Advocate Award

(NORTHERN VA, July 12, 2004) - Technatomy Corporation announced today that it has been awarded the 2004 Private Sector Small Business Advocate Award by the Asian American Business Roundtable (AABR). Technatomy Corporation received the award for exemplary contributions to veteran-owned and service-disabled veteran-owned businesses and actively participating in and serving on the Task Force for Veterans' Entrepreneurship.

"As a veteran-owned, small business, we understand the power of commitment and the entrepreneurial spirit that is required for small businesses to succeed," commented Nadeem Butler, Technatomy president and CEO and continued, "This award recognizes our commitment to fostering the success of small businesses and our appreciation for developing relationships that contribute to economic and business success."

Technatomy Corporation's contributions that lead to its nomination included consulting services to veteran-owned and service-disabled veteran-owned on GSA Schedules, identifying Federal customers, and differentiation among government contracts. Nominations were submitted by Federal executives and reviewed by an impartial team assembled by the AABR.

"Mr. Butler has contributed so greatly to his fellow Veterans that it is only accurate that he be recognized...his experience on active duty and his extensive knowledge of management and information technology. . .have been extremely valuable in understanding many not evident points of views regarding implementing information technology within the federal procurement process." stated Eddie Gleason, Associate Director of Government Relations, VVA & Coordinator, Task Force for Veteran's Entrepreneurship who submitted Technatomy nomination.

With over 15 years of management and information technology experience, Nadeem Butler founded Technatomy Corporation in July 2000. Serving as the company's President and CEO, Butler draws on his military experience as a US Army Ranger and over 18 years professional experience for Technatomy's vision: having the right decision-enabling information when and where needed. Technatomy Corporation, a service-disabled veteran-owned 8(a), specializes in information technology, program management, and logistics and engineering services.

The 2004 AABR Excellence Awards will be presented September 2004 at a ceremony and awards dinner.

About Nadeem Butler, president, Technatomy Corporation

Butler's professional experience includes working with CACI, Universal Systems, and InfoTech Enterprises, where he held the positions of software developer, project manager and director of business development. With this experience, he gained an expert understanding of system development life cycle and various system development methodologies.

Butler earned a Bachelor of Science from George Mason University (1991) before earning a Master of Science in Information Systems from the George Washington University (1998). He began his professional career in 1985 by enlisting in the US Army, serving with the 75th Ranger Regiment. During his service, Butler graduated from US Army infantry school, airborne school, ranger school, airborne jumpmaster school, pathfinder school, and expert infantry. Upon honorable completion of his active duty services in 1988, he was awarded the Army Commendation Medal (ARCOM).

About VVA

Founded in 1978, Vietnam Veterans of America, Inc. is the only national Vietnam veterans' organization congressionally chartered and exclusively dedicated to Vietnam-era veterans and their families. VVA is organized as a not-for-profit corporation and is tax-exempt under Section 501(c)(19) of the Internal Revenue Service Code. VVA'S FOUNDING PRINCIPLE: *"Never again shall one generation of veterans abandon another."*

About AABR

The Asian American Business Roundtable (AABR) was established in 1989 to help Asian/Pacific and other minority-owned companies expand their market with the Federal government as well as the commercial sector by providing information that is accurate and timely to enable them to make informed decisions beneficial to their companies.
