TECHNATOMY CORPORATION AWARDED MARINE CORPS STUDIES SYSTEM CONTRACT

(NORTHERN VA, March 3, 2006) - Technatomy Corporation announced today that it has been awarded a study contract under the Marine Corps Studies System to examine the sustained manpower capability of the Marine Corps Reserve as it engages in the global war on terrorism. This year-long study will determine the impacts of Department of Defense policies and public law on the Marine Corps Reserve's ability to manage manpower assets as they augment Active Duty forces in areas of the world such as Iraq and Afghanistan.

The Marine Corps Studies System provides studies and analyses to ensure the Marine Corps has greater understanding of issues and alternatives concerning organizations, tactics, doctrine, policies, force plans, strategies, procedures, intelligence, weapon selection, system programs, and resource allocations. Study results support decision makers and shape the future direction of the Marine Corps.

"It is our intent to provide unsurpassed value to the Marine Corps through our research and analytical processes" said Nadeem Butler, CEO of Technatomy Corporation. "Our experienced study team's expertise in Marine Corps logistics and manpower issues will provide the Marine Corps with the solutions they need."

This is the first award of a Marine Corps contract to Technatomy Corporation and represents a significant increase in the scope of programs administered by the corporation. Technatomy Corporation is headquartered in Fairfax, VA.
