National Institutes of Health (NIH) Awards Technatomy Corporation 3-year, \$1.6M Intelligent Process Automation Services Contract for the National Eye Institute

FAIRFAX, VA — Technatomy Corporation, a leading federal health IT systems integrator, was recently awarded the National Eye Institute’s (NEI) Business Process Management (BPM) Application & Development services contract by the Executive Branch of the Department of Health and Human Services, National Institutes of Health (NIH). This award continues the current work that Technatomy has been delivering to NEI for the past three years.

Under this new contract, Technatomy will provide agency-wide enterprise BPM solutions and services including design, development, implementation, deployment, administration, and business process analysis. Specifically requested services include, but are not limited to, project management, process mapping, process analysis, data extraction, data analysis, database support, change management, ongoing certification and accreditation (C&A), and operations and maintenance (O&M).

To deliver these services, Technatomy leverages its acclaimed IntrafaciX™ innovation division to provide leading edge solutions in Health Information Technologies (HIT), Intelligent Process Automation (IPA), Data Engineering and DataOps (DE&O), and Systems Engineering and Integration (SE&I). This particular innovation program at NIH NEI, and its mission impact, was the basis of a “FedHealthIT” Innovation Award in 2019.

This three-year contract will help ensure NIH NEI’s business process management program remains effective in helping transform and modernize legacy processes into efficient, digital-based, automated workflows with easy status tracking, clear transparency, and much faster time to complete.

“We are proud to serve NIH’s National Eye Institute and be part of their digital transformation and modernization journey toward delivering superior agency-wide business process management services,” noted Nadeem Butler, Technatomy’s Managing Director. “We are especially honored to have been selected to continue the work we started three years ago and support this agency in meeting its mission goals.”

About Technatomy

Technatomy Corporation is a leader in Digital Transformation Solutions Integration for the Federal Government, specializing in intelligent process and data automation for Health IT, Defense & Logistics, and Civilian agency applications. Located in Fairfax, VA, its IntrafaciX Innovation Center highlights integrated artificial intelligence, machine learning, predictive analytics & visualization, digital workflow & robotic process automation, mobile & IoT technologies. The firm’s dedication to customer satisfaction is exemplified by its well-credentialed associates, advanced ISO and CMMI quality certifications, and a 20-year history of service excellence.
